

AAV Vector Production - Triple Transient Transfection System

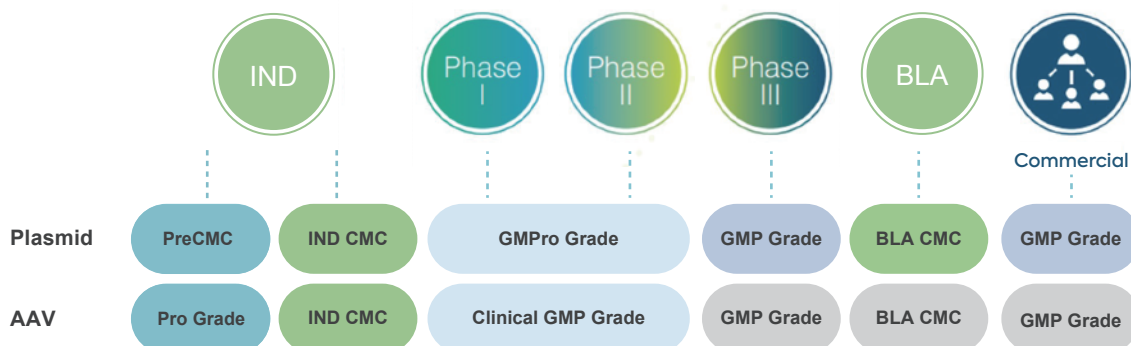

Proprietary **PowerS™-ITRs** strain, other commercial strains available

Ready to used
AAssistV™-pHelper plasmid with **FDA DMF registration** (MF29497)

Ready to used
AAssistV™-pRC plasmid with **FDA DMF registration** (MF29497)

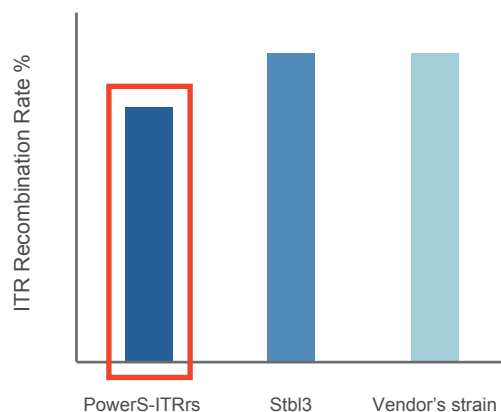

Proprietary **PowerS™-293** suspension cell line with **FDA DMF registration** (MF29801)

A Global One-stop shop multi-modality CDMO partner with solid service delivery experience and leading value proposition

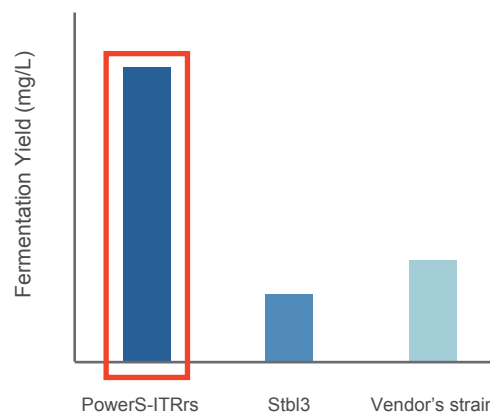

PowerS™-ITRs Strain for Transfer Plasmid: Lower Recombination Rate with Higher Yield

□ Lower ITR Recombination Rate in P10

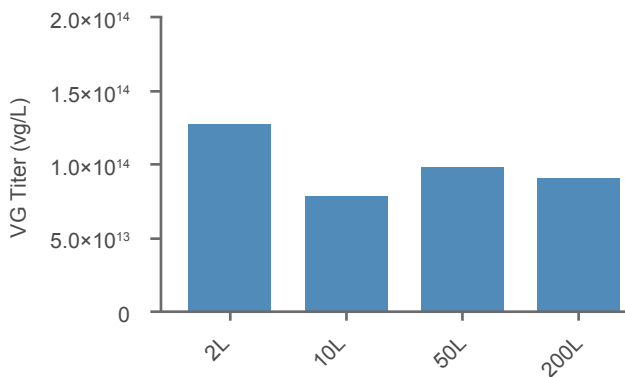

□ Higher Fermentation Yield

Proprietary Cell Line PowerS™-293 for AAV Manufacturing

- Robust and scalable manufacturing process for different serotypes, **up to 200L**
- **Titer $\geq 1E14$ vg/L**, similar yield as Benchmark
