RAPID SOLUTION FOR FULLY HUMAN ANTIBODY DISCOVERY

Beacon™ Screening Workflow

As fast as **1 month** to get functional fully human antibody using transgenic animals

3 Transgenic Animal Platforms Available

OmniAb® is one of the best transgenic animal platform all over the world and only authorized CROs can provide antibody discovery services for OmniAb's clients.

OmniAb have partnered with over 40 companies and universities on developing therapeutic antibodies. A range of antibodies from their animals are now in advanced clinical development by OmniAb partners globally and some are bound to hit the markets in coming years.

Alloy provides a royalty-free humanized transgenic mouse platform which is welcomed by not only industrial customers but also academic users.

CAMouse™ is the 1st transgenic mice platform with independent intellectual property rights in China. CAMouse is designed to maintain IgM BCR Structure, ensuring the regular development of B cell, producing fully human IgG. There are two exclusive licensing structures ONLY for GenScript ProBio customers are available. Minimalist milestone design, no royalty charged. Contact us for detailed information.
